## PROFESSIONAL SUMMARY

Technology Delivery Manager and Full Stack Developer with 13+ years of experience in leading enterprise-scale digital transformations across banking, telecom, and product domains. Proven track record in delivering ReactJS + Spring Boot microservices, managing Agile teams, and driving end-to-end project execution from requirement gathering to production deployment.

Strong technical foundation in Java, React, Kafka, Azure DevOps, Docker, and Microservices Architecture, with leadership experience in mentoring teams, stakeholder management, and delivering business-critical solutions on time and within scope.

---

## CORE COMPETENCIES

- Delivery & Program Management (Agile/Scrum)
  - Full Stack Development (React, Spring Boot)
  - Java, REST APIs, Microservices
  - Kafka, CI/CD, Docker, Azure DevOps
  - Cloud Deployment (Azure, AWS)
  - Stakeholder & Team Management
  - Performance Monitoring (Grafana, CleverTap)
  - UI/UX Architecture, RBAC, IGA Security
- 

## CURRENT EMPLOYMENT

Technology Delivery Manager | IDFC FIRST BANK

Nov 2022 – Present | Bangalore, India

Role: Product Delivery, Technical Leadership, Frontend & Backend Development (React + Spring Boot)

Reporting to: Engineering Manager / Product Owner

---

## 1. Wealth IDFC

Product: CDP Winsoft Kafka Integration, IPO Rate Type Module, Demetrix

Role: Technology Delivery Manager / Java Developer

Responsibilities:

- Led BRD discussions and requirement finalization with business and product teams.
- Delivered scalable backend microservices integrating Kafka producer/consumer pipelines.
- Drove Agile sprints, tracked JIRA tickets, and ensured timely delivery.
- Mentored developers on Kafka integration, smart schedulers, DevOps (Windows Server), and JUnit testing.
- Created Confluence documentation for workflows, RBAC, and deployment guidelines.
- Delivered and demoed working solutions to stakeholders.

Tech Stack: Java, Spring Boot 4.0, Kafka, Windows Server, Azure DevOps, Docker, Smart Scheduler, JUnit, SQL Server, Oracle, H2 DB

---

## 2. WMS IDFC

Product: Demetrix Bridge, CommsHub Reporting (Kafka)

Role: Technology Delivery Manager / Java Developer

Responsibilities:

- Architected and implemented CommsHub reporting using Kafka and Grafana dashboards.
- Integrated CleverTap analytics for performance and event tracking.
- Drove Agile ceremonies, mentoring team members, and resolving technical blockers.
- Built backend services using Spring Boot and automated deployments with Azure DevOps.

Tech Stack: Java, Spring Boot, Kafka, Grafana, CleverTap, Azure DevOps, Docker, H2 DB

---

## 3. Prime Portal IDFC

Product: Rate-type-TFx, Fema Overdue-TFx, Channel Setup-Wholesale  
Role: Delivery Manager / React Developer

Responsibilities:

- Spearheaded end-to-end UI development using React 18.1, Redux, and CI/CD pipelines.
- Designed and delivered the Rate Type-TFx module—recognized among the Top 10 Innovative Solutions in the bank.
- Independently designed UX, implemented secure RBAC access and IGA services.
- Collaborated with backend teams for API integration and business testing.

Tech Stack: React 18.1, Redux, Node.js, GOCD Pipeline, Azure DevOps, Jest, ESLint, Yarn

---

#### 4. Trade-FX IDFC

Product: Inward Remittance, Swift-GPI, Error Contextualisation  
Role: Delivery Manager

Responsibilities:

- Managed and guided teams to deliver multiple FX modules.
- Contributed to ReactJS front-end development and system integration.
- Collaborated with PO and BA for BRD analysis and sprint delivery.
- Led business demos and release planning.

Tech Stack: React 18.1, React Native, Node.js, Azure DevOps, GOCD, Jest, ESLint

---

## PREVIOUS EMPLOYMENT

---

Lead Developer / Architect | CIKLUM (Digital Diamondpick)

Mar 2022 – Oct 2022

Project: Diamondpick (Internal)

Responsibilities:

- Designed and architected React-based UI components for the internal HR product.
